Adama Model High School

2018 – 2021

Certificates

- Web Programming 

PROJECTS

HOSPITAL MANAGEMENT SYSTEM (HMS)

Role: UI/UX Designer & Full-Stuck Developer

- Objectives: Designed and developed a web-based system to streamline hospital operations including patient management, appointments, pharmacy, laboratory, and billing workflows.
- Skills Utilized: Figma for UI/UX design, HTML, CSS, JavaScript for frontend, PHP & MySQL for backend development.
- Impact: Improved operational efficiency by automating hospital workflows, enhancing data accuracy, and providing a responsive, user-friendly interface for multiple roles

ADMIN DASHBOARDS

Role: UI/UX Designer & Full-Stuck Developer

- Objectives: Designed several admin dashboard interfaces to simplify data management and user interaction.
- Skills Utilized: Figma for mockups, React and Tailwind for responsive layouts.
- Impact: Streamlined processes, significantly reducing administrative workload.
